J. V. BAILEY, NURSERYMAN

Following is a list of nursery stock, with prices for spring delivery. These quotations are f. o. b. St. Paul, or at nursery, except where otherwise stated.

PURE-BRED STRAWBERRY PLANTS

In the Home Garden or On the Farm

Nothing is So Delicious or So Profitable
as Strawberries

To my friends and customers who know my strawberry plants, it is unnecessary to say anything, but to those who have not tried my plants, I will say that they are sturdy, well rooted, pure bred, year-old plants. They have been mulched all winter to insure abundant vitality to withstand transplanting. I use commercial fertilizer at considerable expense to produce plants of the very best quality. My thirty years experience as a berry grower has convinced me that plants propagated for transplanting should excel in root vitality.

Barnyard manure, while producing luxuriant tops, does not develop root strength in the young plant equal to that produced by the especially prepared fertilizers.

Each order is dug and packed separately and shipped the same day. I do not dig large quantities of plants and then fill orders from a stock room.

Plants are tied twenty-five in a bundle.

Formerly I have propagated twenty-five or more varieties of strawberry plants, but have eliminated many of these and now offer only the best to grow in Minnesota and surrounding states.

All the varieties which I grow are perfect flowered and any one variety will produce fruit when planted alone, which is not the case with pistillate or imperfect flowering varieties.

Every garden should have a strawberry bed large enough to supply the family with ripe strawberries, from the middle of June until October, besides enough for canning purposes. Do not fail to get some of my plants this year.

Everbearing Varieties

PROGRESSIVE—Stamineate: Very productive. Fruit medium size and of excellent quality. Produces fruit from about a week earlier than any June variety until late fall. 50c per dozen, \$1.00 for 25, \$1.75 for 50, \$3.00 per 100. Postage paid. \$20.00 per 1000.

SUPERB—Stamineate: Fruit very large and attractive. While this is one of the best everbearing varieties, I consider it the best June bearing variety also. I usually grow a heavy crop of this variety in the fall, and the following spring the same plants produce an immense crop of excellent fruit. 50c per dozen, \$1.00 for 25, \$1.75 for 50, \$3.00 for 100. Postage paid. \$20.00 per 1000.

J. V. BAILEY, NURSEYMAN

June Bearing Varieties

PREMIER—Stamineate: I am pleased to offer a new strawberry that I can recommend to be an improvement over all other early varieties. This variety was introduced by R. M. Kellogg, and has proven to be just what we were looking for in an early fruiting variety. Plants grow large and are wonderfully productive. The berries are large and of a beautiful glossy red color. I have never found so many good qualities in an early berry. I have talked with several growers who have tried out this variety and they are all enthusiastic about it. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.50; \$7.00 per 1000.

MINNEHAHA, formerly known as Minnesota No. 935—Stamineate: While this is one of the newer productions, it has been tried out enough to be placed among the best varieties. Fruit is very large, season of ripening late. Plants very hardy. I consider this our best late variety. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.25; \$6.00 per 1000.

MINNESOTA, formerly known as Minnesota No. 3—Stamineate: This variety has become so well known that it is not necessary to describe it here, other than it is an early variety resembling the Senator Dunlap in many respects. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.25; \$6.00 per 1000.

GIBSON—Stamineate: This is one of my best early varieties. Many of the commercial growers are growing this variety for their main crop. 25 plants .50c, 50 plants \$1.00, 100 plants \$1.25; \$6.00 per 1000.

SENATOR DUNLAP—Stamineate: The Senator Dunlap is too well known to require a description. It is still a very popular strawberry. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.25; \$6.00 per 1000.

NOKOMIS—Stamineate: A new production of the State Fruit Breeding Farm which promises to become popular as a late home garden strawberry. Very productive, fruit large and good in quality. I have only a limited stock of this strawberry. 50c per dozen, \$1.00 for 25, \$1.75 for 50, \$3.00 per 100.

ASPARAGUS

PALMETTO—Strong yearling roots. \$2.00 per 100; \$10.00 per 1000.

RHUBARB OR PIE PLANT

MAMMOTH VICTORIA—This variety is larger and of better quality than any of the old varieties. Divided roots, 20c each; \$1.25 per 10. For larger quantities I will quote prices on application.

CURRENTS

The following varieties have all proven excellent in my fruiting field. They are far superior to the old varieties, which I have discarded.

LONG BUNCH HOLLAND, POMONA, WILDER, DIPLOMA, CHERRY CURRANT, BLACK CHAMPION CURRANT, AND WHITE GRAPE CURRANT—30c each; \$3.00 per dozen; \$20.00 per 100.

LONDON MARKET, RED CROSS—25c each, \$2.50 per dozen, \$12.00 per 100.

J. V. BAILEY, NURSEYMAN

RED RASPBERRIES

LATHAM, formerly known as Minnesota No. 4—This berry has become so well known that it is not necessary to describe it here. 10 plants \$1.00, 25 plants \$1.50, 100 plants \$6.00; \$40.00 per 1000.

REDPATH—I introduced this new raspberry for the first time in 1920. At that time I was satisfied of its superior qualities, and after two more years of fruiting, I am convinced it is the best raspberry at the present time. This is the berry you have been looking for. Fruit a bright red, firm and very large, a heavy yielder and perfectly hardy. This variety does not seem susceptible to the diseases common to the red raspberry. If you want the best, do not fail to order some of these plants. 10 plants \$1.25, 25 plants \$2.50, 50 plants \$5.00, 100 plants \$8.00; \$60.00 per 1000.

MINNESOTA NO 1—This is an early red raspberry, a good yielder, fruit large and bright red; not quite so hardy as Redpath, but about two weeks earlier. 10 plants \$1.00, 25 plants \$1.50, 100 plants \$5.00; \$35.00 per 1000.

EVERBEARING RED RASPBERRIES

ERSKIN PARK—This is probably the best everbearing red raspberry for this climate. Bears abundantly from July until late fall. Fruit is rather dark but of good quality for home use. 10 plants \$1.00, 25 plants \$1.50, 100 plants \$6.00; \$35.00 per 1000.

BLACK RASPBERRIES

BLACK PEARL—I have found this variety the best for our severe climatic conditions, after trying out several varieties. Fruits abundantly, and the berries are large and perfect shaped. 10 plants \$1.50, 25 plants \$3.00, 100 plants \$10.00.

GOOSEBERRIES

THE CARRIE—This variety has become so well known that I do not need to mention its many good qualities, but I will say that it is nearly thornless, is practically disease resisting, and a heavy bearer. 30c each, \$3.00 per dozen.

GRAPE

BETA—This grape has become very popular, as it is early, very productive and does not require covering in the winter, as it is as hardy as the wild grape of Minnesota.

ALPHA—A hardy grape that does not require winter covering. Considered, by many growers, superior to the Beta.

HUNGARIAN—This is a hardy grape that produces a larger fruit than the Beta, but is a slower growing vine and probably not so productive.

JANESVILLE—A hardy grape somewhat later than the Beta, or Alpha. A good producer.

CONCORD—This variety is very well known.

WHITE NIAGARA—A large variety of the white grape.

CAMPBELL'S EARLY—A very good grape of the purple sort.

Any of the above varieties—40c each, \$3.00 for 10, \$20.00 per 100.

J. V. BAILEY, NURSEYMAN

APPLE TREES

WEALTHY, DUTCHESS, PATTEN'S GREENING, OKEBENA, PEERLESS, HIBERNAL, McINTOSH, MALINDA, SCOTT'S WINTER, YELLOW TRANSPARENT, VIRGINIA CRAB, WHITNEY CRAB—5 to 7 ft. trees, three years old. 75c each, \$8.00 per dozen, \$60.00 per 100.

PLUMS

We have felt the need of a better plum for the Northwest, and have been watching, with interest, the development of the new varieties originated at the Minnesota State Fruit Breeding Farm. These plums are far superior to the older varieties which we have been growing, and I feel perfectly safe in recommending them. They are very fast growing and usually come into bearing the second year after setting. I have selected and propagated the following varieties which have shown exceptional qualities. For description of the varieties see supplement, or write. Do not pay exorbitant prices for these new plums.

TONKA (Minn. No. 21), **UNDERWOOD** (Minn. No. 91), **RED WING** (Minn. No. 12), **MONITOR** (Minn. No. 70), **MOUND** (Minn. No. 50), **GOLDEN ROD** (Minn. No. 120), **ELLIOTT** (Minn. No. 8), **WINONA** (Minn. No. 30), **WACONIA** (Minn. No. 10),—My price is \$1.00 each; \$95.00 per 100.

DE SOTA—Three year old trees, 50c each.

HYBRID CHERRY-PLUMS

While cherries are a very desirable fruit, they have proven very unsatisfactory to raise in Minnesota, as there are only a few varieties that do well, and the birds usually take the fruit before it is ripe enough to pick. The State Fruit Breeding Farm has originated the two following hardy varieties of fruit which have the flavor and good qualities of the cherry, and the birds do not eat them. They yield abundantly and the fruit is delicious, and is especially good for canning. For description see supplement.

ZUMBRA—75c each.

ST. ANTHONY—75c each.

CHERRIES

HOMER—Probably the best true cherry to raise. 75c each.

VINES

BOSTON IVY—each ----- 35c

HARDY GRAPES—See Grapes.

HEDGE PLANTS

BUCKTHORN—25c each, \$20.00 per 100.

BARBERRY THUNBERGII—18 to 24 inches, 30c each, \$25.00 per 100.
12 to 15 inches, 20c each, \$15.00 per 100.

ARBOR VITAE—See Evergreens.

RED CEDAR—See Evergreens.

J. V. BAILEY, NURSEYMAN

ORNAMENTAL SHRUBS

DOUBLE FLOWERING ALMOND—each	\$1.50
DOUBLE FLOWERING CRAB—each	\$1.50
DOUBLE FLOWERING PLUM—each	\$1.50
PURPLE LEAF PLUM, NEWPORT (Minn. No. 116)—Described in Supplement, each	\$2.00
SNOWBERRY—	50c each, 3 for \$1.00
LILAC, PURPLE—each	35c
LILAC, WHITE—each	50c
SPIREA V. H. (Bridal Wreath)—Large plants	75c each, Medium plants 50c each.
TARTARIAN PINK HONEYSUCKLE—each	50c
SNOWBALL—each	50c
MOCK ORANGE—each	50c
HYDRANGEA P. G.—(Blooms in late summer)—Large plants	75c each, Medium sized plants 50c each.
HYDRANGEA, HILLS OF SNOW—(Blooms in early summer)	75c each

EVERGREENS

In comparing my price with those of other nurserymen, remember that height alone cannot, by any means, establish values. An Evergreen tree grown close and crowded in the row may be the same height as one of my Evergreens, but will not be as heavy, compact, symmetrical or have as good roots.

Constant transplanting and root pruning give my Evergreens masses of fine, fibrous feeding roots which has been the main reason for the success that my customers have had in making Evergreens, bought from me, grow.

The soil that I grow Evergreens in is just the right texture for balling the roots. When I ball and burlap an Evergreen the roots are never disturbed but the soil goes with the tree. There will be an extra charge of 50c each for ball and burlap, but this is not necessary unless they are very large or they are to be shipped a long distance.

COLORADO BLUE SPRUCE—1½ to 3 feet, twice transplanted, \$1.00 to \$3.00, according to size and color; 3 to 5 feet, three times transplanted, \$2.00 to \$7.00, according to color of foliage and individual specimen. I have a fine lot to select from.

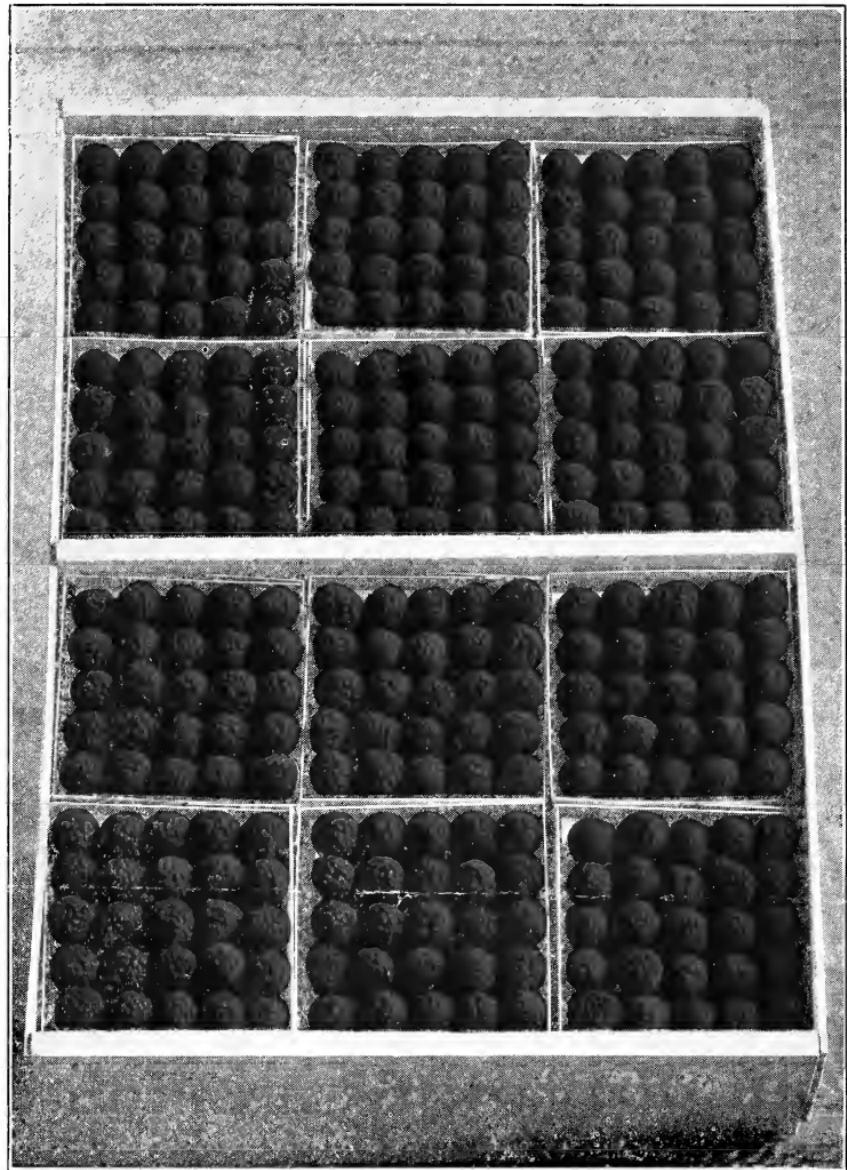

NORWAY SPRUCE—Three times transplanted; 3 to 4 feet, \$1.00 each; 4 to 5 feet, \$1.50 each.

BLACK HILL SPRUCE—A very fine lot to select from; 3 to 5 feet, \$1.50 to \$2.00 each, according to specimens.

WHITE SPRUCE—18 to 24 inches, \$1.00 to \$1.25 each.

RED CEDAR—1 to 2 feet, 50c to \$1.00 each.

ARBOR VITAE—12 to 18 inches, 50c; 2 to 3 feet, 75c each.

A Photographic Reproduction of the
REDPATH RED RASPBERRY

Note the size of the berries. Twenty-five make a full layer in the boxes, the berries being an inch in diameter. The boxes shown are regular size pint berry boxes.

The yield of this splendid berry is equal to the size of the berries, for it is an unusually heavy bearer. The quality is of the best, and it is a market favorite.

Introduced and Distributed by

J. V. Bailey, Nurseryman

Dayton's Bluff Station - - - St. Paul, Minnesota

J. V. BAILEY, NURSERYMAN

SHADE TREES

WHITE ELM—10 to 15 feet, \$2.00 to \$5.00 each, according to individual specimens.

WHITE BIRCH—5 to 15 feet, \$1.00 to \$2.00 each.

WHITE BIRCH (Cutleaf Weeping)—12 feet, \$7.50 each.

MOUNTAIN ASH—\$1.00 to \$2.00, according to size.

HARD OR SUGAR MAPLE—\$1.00 to \$2.50, according to size.

SOFT MAPLE, NORWAY MAPLE, WHITE ASH—12 to 20 ft., \$2.50 each.

Will quote prices on evergreens or shade trees in quantities on application.

HARDY PERENNIAL PLANTS

PEONIES—White, Pink and red, divided roots, 30c each.

IRIS—Blue, 20c each; \$1.25 for ten.

PERENNIAL PHLOX—25c each; \$2.00 for 10.

MY GUARANTEE AND TERMS

That all nursery stock herein quoted is grown under modern scientific methods.

That plants are securely and freshly put up in damp packing material.

That all nursery stock is true to name and correctly labeled.

That certificate of inspection accompanies each shipment of nursery stock.

In no case will I be liable for more than the original purchase price.

Prices quoted in this price list are f. o. b. St. Paul or at nursery.

Deliveries will be made daily to the different express offices in St. Paul and to the St. Paul post office.

Cash with order when stock is to be shipped, or will accept one-fourth of purchase price in advance and ship goods C. O. D. for balance if preferable.

Inspection Completed July 26, 1922

STATE DEPARTMENT OF AGRICULTURE

Office of State Entomologist

St. Paul, Minnesota, September 20, 1922

CERTIFICATE OF NURSERY INSPECTION

This is to certify that in accordance with Sec. 1, Chapter 206, Session Laws of 1913, the nursery stock and premises of The Bailey Nursery, of Newport, Minn., J. V. Bailey, Proprietor, have been carefully examined by a duly authorized inspector and found apparently free from dangerously injurious insects and contagious plant diseases.

This certificate is good until November 1st, 1923, unless revoked, and covers only stock actually on the premises when examined.

N. J. HOLMBERG,
Commissioner.

A. G. RUGGLES,
State Entomologist.
